182 DA₂ P + PARVO

per O - deworming due per breeder.

Has had since 10 wks old. From breeder in Lick
Eating + drinking fine. Vom 1st meal when ate
too much + vom on car ride here. No s/d's.

PE: 1) BAR; nice but a little shy
5) ears cropped + taped by breeder (who is doing
all the re-taping)

Assess: healthy puppy. Discussed diet (recomm legs
breed puppy formula that is AAFCO approved)
I am not familiar w/ owners brand currently by
Feeding TD meals. Encouraged socialization
w/ lots of positive experiences. Recomm.

	Plan: in 2 1/2 - 3 wks, 4 mo puppy visit / discussion + last dist, P+ Parvo, Rabies, etc.		
	LST.		
	6-10-16 I called to report that P has had diarrhea since giving HG on 6-4-16. P is eating and drinking well, active, all else is ok!		
	I also note P has a few "pimples" on nose and below ear on side of face. Recommended to bring in stool samples to rule out parasite. Not sure if associated w/ HG tx.		
	I said I would ask Dr. about "pimples".		
	Recomm bland diet for diarr. "Pimples" uncommon on head, face. Can't tell much more w/out seeing them. If not fixing in numbers & not bothering Izzy, can monitor if owner prefers. Agree w/ stool sample recomm.		
	HB LMR SISUPM re: above answer to LST questions.		
	6-14-16 I dropped off fecal sample. CR		
	6-14-16 Idexx # B1522144		
	Intestinal Parasite Screen no ova or parasites seen		
	Sx Giardia - negative, UNWOB (P)
